Executive Summary

Kennedy/Jenks Consultants (Kennedy/Jenks) was retained by Trammell Crow So Cal Properties, Inc. (TCSCPI) to prepare a Phase I Environmental Site Assessment (Phase I ESA) for the industrial property located at 17300 Perris Boulevard in the City of Moreno Valley, California. The property will be referred to as the "Subject Property" throughout this report. The Subject Property relative to its surrounding vicinity is illustrated on Figure 1.

Kennedy/Jenks understands that TCSCPI intends to purchase the Subject Property, which is an industrial property currently occupied/operated by El Dorado Stone. The Subject Property is situated on 52.05 acres and has Assessor Parcel Numbers (APNs) of 312-250-030, 312-250-031, 312-250-032, 312-250-036, 312-250-037, and 312-250-038. Property improvements associated with El Dorado Stone include an approximate 130,000 square foot (SF) manufacturing building, an approximate 12,000 SF office building, surrounding paved areas used for parking and open-air storage, and minor landscaping. An earthen retention basin and vacant land are located in the eastern portions of the Subject Property. TCSCPI intends to demolish the existing structures and redeveloping the entire Subject Property with an approximate 1,150,000 SF industrial facility referred to as the Dorado Logistics Center.

Work performed to prepare this Phase I ESA was conducted on behalf of TCSCPI, also referred to as the User throughout this report. The Phase I ESA was conducted in accordance with the United States Environmental Protection Agency (EPA) All-Appropriate Inquiry (AAI) rule (40 CFR, Part 312) as described in the American Society for Testing and Materials Standard E1527-05 (ASTM E1527-05). The purpose for the Phase I ESA was to inform TCSCPI of any Recognized Environmental Conditions (RECs) or Notable Findings pertaining to the Subject Property.

A REC is the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into the structure, on the property, or into the ground, groundwater, or surface water of the property. The term *historical recognized environmental condition* means an environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered as a *recognized environmental condition* currently. Findings that are not classified as a REC, but have the potential to affect the Subject Property are identified as Notable Findings.

Significant Findings

No RECs or Notable Findings were identified for the Subject Property or surrounding area.

Recommendations

Based on the foregoing findings of this Phase I ESA conducted at the Subject Property, as well as representations made by individuals interviewed for this report, Kennedy/Jenks does not recommend further environmental action/investigation of the Subject Property at this time.

Section 1: Introduction

Kennedy/Jenks Consultants (Kennedy/Jenks) was retained by Trammell Crow So Cal Properties, Inc. (TCSCPI) to prepare a Phase I Environmental Site Assessment (Phase I ESA) for the industrial property located at 17300 Perris Boulevard in the City of Moreno Valley, California. The property will be referred to as the "Subject Property" throughout this report. The Subject Property relative to its surrounding vicinity is illustrated on Figure 1.

Kennedy/Jenks understands that TCSCPI intends to purchase the Subject Property, which is an industrial property currently occupied/operated by El Dorado Stone. The Subject Property is situated on 52.05 acres and has Assessor Parcel Numbers (APNs) of 312-250-030, 312-250-031, 312-250-032, 312-250-036, 312-250-037, and 312-250-038. Property improvements associated with El Dorado Stone include an approximate 130,000 square foot (SF) manufacturing building, an approximate 12,000 SF office building, surrounding paved areas used for parking and open-air storage, and minor landscaping. An earthen retention basin and vacant land are located in the eastern portions of the Subject Property. TCSCPI intends to demolish the existing structures and redeveloping the entire Subject Property with an approximate 1,150,000 SF industrial facility referred to as the Dorado Logistics Center.

1.1 Purpose

Work performed to prepare this Phase I ESA was conducted on behalf of TCSCPI, also referred to as the User throughout this report. The Phase I ESA was conducted in accordance with the United States Environmental Protection Agency (EPA) All-Appropriate Inquiry (AAI) rule (40 CFR, Part 312) as described in the American Society for Testing and Materials Standard E1527-05 (ASTM E1527-05). The purpose for the Phase I ESA was to inform TCSCPI of any Recognized Environmental Conditions (RECs) or Notable Findings pertaining to the Subject Property.

A REC is the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into the structure, on the property, or into the ground, groundwater, or surface water of the property. The term *historical recognized environmental condition* means an environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered as a *recognized environmental condition* currently. Findings that are not classified as a REC, but have the potential to affect the Subject Property are identified as Notable Findings.

1.2 Detailed Scope of Services

1.2.1 Phase I ESA

The Phase I ESA was conducted in accordance with the United States Environmental Protection Agency (EPA) All-Appropriate Inquiry (AAI) rule (40 CFR, Part 312) as described in the American Society for Testing and Materials Standard E1527-05 (ASTM E1527-05). At a minimum, the following activities were performed to accomplish the Phase I ESA objectives:

- **Subject Property Reconnaissance** – A visual and physical observation of the Subject Property was conducted in readily accessible areas to identify RECs or Notable Findings associated with environmental conditions. Additionally, visual observations of adjoining properties were made from the vantage point of the Subject Property as well as from public right-of-ways to assess the potential impact of these properties on the Subject Property.
- **Subject Property Representative Interview** – An interview was conducted with individuals knowledgeable and familiar with the Subject Property.
- **Environmental Lien Search** – An environmental lien is a charge, security, or encumbrance on a property's title to secure payment of cost or debt arising from response actions, cleanup, or other remediation of hazardous substances or petroleum products. A lien search was conducted for the Subject Property.
- **Agency Records Review** – Available environmental reports, agency records (state and local agencies), and appropriate permits were reviewed to identify reported environmental concern or incident associated with the Subject Property.
- **Historical Research** – At a minimum, readily available sources of historical information related to the Subject Property and adjoining properties were researched to identify historical land use practices that have the potential to adversely impact environmental conditions at the Subject Property. Sources of historical information to help identify RECs or Notable Findings in connection with the Subject Property include historical aerial photographs, historical topographic maps, Sanborn Fire Insurance Maps, and City Directories.
- **Government Database Review** – Published governmental federal and state databases were reviewed to identify properties within ASTM-specified radii of the Subject Property with a reported environmental concern or incident. Kennedy/Jenks subcontracted the compilation of government database search to Environmental Data Resources, Inc. (EDR).
- **Report Preparation** – This written summary of the findings and recommendations of the Phase I ESA was prepared.

1.3 Environmental Professional Qualifications

This Phase I ESA was prepared under the supervision of Robert Logan (PG 5088) of Kennedy/Jenks. Mr. Logan has Bachelor and Master of Science degrees in Geology and is a California Registered Professional Geologist with over 20 years of experience consulting on site assessment and remediation projects. Mr. Logan meets the qualifications for an environmental professional as stated in the ASTM E 1527-05 standard.

Information acquisition, compilation, and interpretation, along with report preparation, were performed by Nadine Stroud, a Kennedy/Jenks geologist. Ms. Stroud has a Bachelor's degree in Geology and over 13 years of experience consulting on site assessment and remediation projects. Ms. Stroud meets the qualifications for an environmental professional as stated in the ASTM E 1527-05 standard.

1.4 Limitations and Exceptions

This Phase I ESA is based on review of readily available environmental records, results of limited interviews, and visual observations of recent Subject Property conditions. The collection or analysis of environmental samples; surveys regarding the presence of asbestos, radon, heavy metal-based paints; or compliance of individual property operations with environmental regulations were not executed during this Phase I ESA. This assessment was not intended to be a comprehensive inspection or assessment of all conditions that might exist at the Subject Property. Findings were developed based on our professional opinion and do not represent a warranty, guarantee, certification, or positive assertion as to the presence, absence, or extent of potential contamination. Kennedy/Jenks' activities were conducted in accordance with practices and procedures generally accepted in the consulting field. Kennedy/Jenks' services were limited to those specified in our proposal, which was accepted by TCSCPI.

1.5 Special Terms and Conditions

This report represents Kennedy/Jenks' professional opinion and judgment, which are dependent upon information obtained during performance of consulting services. Environmental conditions may exist at the Subject Property that cannot be identified by visual observations or were obscured from view by vegetation, poor lighting, or other materials during Kennedy/Jenks' visit to the Subject Property. Kennedy/Jenks' conclusions were based in part on information supplied by others, the accuracy or sufficiency of which has not been independently reviewed by Kennedy/Jenks. No investigation can be thorough enough to exclude the presence of hazardous materials at a given Subject Property; therefore, if no hazardous materials are identified during an assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Subject Property, but rather the results of services performed within project scope, cost, and other limitations.

Any opinions presented apply to the Subject Property conditions at the time of performance of services and do not address the potential for future releases. Changes in applicable environmental standards, practices, or regulations may occur following performance of services, which could impact the opinions presented.

1.6 Reliance

This report is intended for the sole use of TCSCPI, and their lenders, partners, and assigns. If other parties wish to rely on this report, please have them contact Kennedy/Jenks Consultants so that a mutual understanding and agreement of the terms and conditions for our services can be established prior to their use of this information.

Section 2: Subject Property Description

The following section provides information about the Subject Property, such as its ownership, general description, environmental setting, current property usage, and also describes the general uses of the adjoining properties and surrounding area.

2.1 Property Owner Information & Occupancy

Review of title information produced by First American Title Company identifies Kothlow Moreno Valley, LLC as the legal owners of APNs 312-250-030 and 312-250-031. Modular/Kitching, LLC is listed in the title report as the legal owner of APNs 312-250-031, 312-250-037, 312-250-032, and 312-250-038.

The Subject Property is currently leased by El Dorado Stone. El Dorado Stone makes the highest quality architectural stone, stone veneer, brick veneer, and other quality manufactured stone products. Since their occupancy in 2005, El Dorado Stone has used the Subject Property solely for shipping and receiving of their product; manufacturing operations do not take place on the Subject Property. Historically, the Subject Property was used for agricultural purposes prior to 2000, and was first developed for light industrial purposes in 2001/2002. Aurora Modular Industries occupied the Subject Property between 2002 and 2004 and manufactured one or more of the following items: metal modular buildings portable structures, grandstands and bleachers, tents and membrane structures, portable toilets, portable box offices, site offices, portable kitchen units, portable prefabricated commercial and industrial structures, and portable structure consolidating components. The current layout of the facility is shown on Figure 2.

2.2 Subject Property Description

The Subject Property is situated on 52.05 acres and has Assessor Parcel Numbers (APNs) of 312-250-030, 312-250-031, 312-250-032, 312-250-036, 312-250-037, and 312-250-038. Property improvements associated with El Dorado Stone include an approximate 130,000 square foot (SF) manufacturing building, an approximate 12,000 SF office building, surrounding paved areas used for parking and open-air storage, and minor landscaping. An earthen retention basin and vacant land are located in the eastern portions of the Subject Property.

2.3 Adjoining Properties and Surrounding Vicinity

The Subject Property is located in a mixed residential and light industrial area of Moreno Valley, California. A generalized description of the surrounding area is as follows:

North: Edwin Road adjoins the Subject Property to the north. A vacant lot, vehicle storage lots, and Moreno Valley Towing are located immediately north of Edwin Road. Perris Valley Storm Channel and a residential development are farther north of the Subject Property.

East: Kitching Street/Nadina Avenue adjoins the Subject Property to the east. Eastern Municipal Water District is located immediately east of Kitching Street/Nadina Avenue. A residential area is farther east of the Subject Property.

South: Modular Way adjoins the Subject Property to the south. Walgreens Distribution Center is located immediately south of Modular Way. Light industrial facilities are farther south of the Subject Property (i.e. Masonite Door Fabrication, a self storage facility, and Ross Distribution Center).

West: Perris Boulevard adjoins the Subject Property to the west. Vacant lots are immediately west of Perris Boulevard. In general, a mixed vacant and light industrial area is farther west of the Subject Property.

2.4 Environmental Setting

This section describes the geologic and hydrogeologic features of the Subject Property.

2.4.1 Regional Geology

According to the EDR Geocheck (Appendix B), the Subject Property is located at 33.87 north latitude and 117.2256 west longitude and is at a topographic elevation of 1,473 feet above mean seal level (msl). The general topographic gradient is towards the east-southeast.

The Subject Property lies within Perris Valley. This valley is an elongated, northwest-southeast trending alluvial basin. Review of the EPA Superfund Record of Decision (ROD) dated June 1996 for the March Air Reserve Base (approximately 1 mile west of the Subject Property) indicates that soils in the vicinity of the Subject Property consist of alluvium. Perris Valley is classified as a broad, almost flat valley with sporadic bedrock hills. These hills are identified as erosional remnants of the underlying crystalline basement rocks. Surficial alluvial deposits consist of interbedded layers of clay, silt, sand, and gravel of varying thickness. Surficial deposits mainly consist of silty sand and sandy silt with varying amounts of clay. In support of this information, Kennedy/Jenks also reviewed a Limited Soils Study prepared by LOR Geotechnical Group, Inc. (LOR) in June 1999 for 19 +/- acres of land located in the general vicinity of the Subject Property. According to soils work done on behalf of the 1999 geotechnical investigation (trench T-1 through T-6), the upper 10 to 12 feet below ground surface (bgs) consisted of mainly silty sand.

2.4.2 Hydrogeologic Information

March Air Reserve Base (MARB) is located approximately one mile to the west of the Subject Property and installed numerous groundwater wells both on the base and offsite as part of their remediation and monitoring program. Based on groundwater information included in Montgomery Watson Harza's (MWH's) 2009-2010 Annual Monitoring Report prepared on behalf of MARB, groundwater is typically encountered at approximately 40 feet bgs (Second Quarter 2010 monitoring dataset). Groundwater flow trends to the southeast. Groundwater is typically stored in the underlying alluvium.

LOR Geotechnical Group, Inc. (LOR) prepared a Phase I ESA for the Subject Property in 2005. The findings of two geotechnical investigations performed at the Subject Property were mentioned in the 2005 Phase I ESA which suggested groundwater to be deeper than 50 feet bgs beneath the Subject Property since it was not encountered to the maximum depth explored of 50 feet bgs during those investigations.

For the purpose of this report, based on the available information provided by the User and agency records, depth to first groundwater is present beneath the Subject Property at depths greater than 50 feet bgs and flows towards the southeast.

2.5 Public Water Wells

According to the EDR Geocheck (Appendix A), three Federal United States Geological Survey (USGS) wells are within a one-mile radius of the Subject Property. One USGS well is located approximately 0.35 miles west of the Subject Property, another well is located approximately 0.6 miles north of the Subject Property, and a third USGS well is located approximately 0.85 miles south of the Subject Property. No Federal Public Water Supply wells or California state wells are within a one-mile radius of the Subject Property.

2.6 Oil and Gas Wells

Based on Kennedy/Jenks' review of maps provided by the State of California Department of Conservation Division of Oil, Gas, & Geothermal Resources (DOGGR) and the EDR Physical Setting Source Map (Appendix A), no oil and gas wells are located within a one-mile radius of the Subject Property.

Section 3: Government Database Review

A review of federal, state, and tribal environmental databases related to the Subject Property and surrounding area in accordance with the ASTM E 1527-05 search radius was conducted to identify potential RECs. Properties that have or may have the potential for existing or future site contamination, environmental liabilities, or the potential for contamination migration to surrounding areas were identified in this database search. Information from these various databases was compiled in the EDR Radius Map Report (EDR Report, Appendix A).

Government database listings reviewed during this Phase I ESA included, but were not limited to:

- USEPA National Priorities List (NPL) within a 1-mile radius
- USEPA Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) sites within a ½-mile radius
- USEPA Comprehensive Environmental Response-No Further Remedial Action Planned (CERC-NFRAP) sites within a ¼-mile radius
- USEPA Corrective Action Report (CORRACTS) sites within a 1-mile radius
- USEPA Resource Conservation and Recovery Information System-Treatment, Storage, and Disposal (RCRIS-TSD) sites within a ½-mile radius
- USEPA "RCRIS-Large Quantity Generator" (RCRIS-LQG) within a ¼-mile radius
- USEPA "RCRIS-Small Quantity Generator" (RCRIS-SQG) within a ¼ mile radius
- USEPA Facility Index System/Facility Registry System (FINDS) for the Subject Property only
- USEPA Emergency Response Notification System (ERNS) sites within the target property
- California EnviroStor Database – ENVIROSTOR within a 1-mile radius
- California Calsites Database – HIST CAL-SITES within a 1-mile radius
- California Bond Expenditure Plan (BEP) within a 1-mile radius
- California Waste Management Unit Database System (WMUDS/SWAT) within a ½-mile radius
- California Cortese within a ½-mile radius
- California Leaking Underground Storage Tank (LUST) within a ½-mile radius

- California Facility Inventory Database (CA FID) within a ¼-mile radius
- California Spills, Leaks, Investigation and Cleanups (SLIC) sites within a ½-mile radius
- California Underground Storage Tanks (UST) within a ¼-mile radius
- California Hazardous Substance Storage Container (HIST UST) within a ¼-mile radius
- California Statewide Environmental Evaluation and Planning System (SWEEPS UST) within a ¼-mile radius
- California Hazardous Material Incident Report System (CHMIRS) for the Subject Property only
- California 65 Notification Records within a 1-mile radius
- California Voluntary Cleanup Program Properties (VCP) within a ½-mile radius
- California Cleaners within a ¼-mile radius; and
- California Facility and Manifest Data (HAZNET) for the Subject Property only.

3.1 Subject Property Summary

The Subject Property was listed in the following government databases:

Kothlow Moreno Valley, LLC: This entity is listed in the Haznet database for generating ignitable hazardous wastes and disposing of these wastes at a recycling facility.

Aurora Modular Industries: This entity is listed as a small quantity generator (SQG) for generating hazardous wastes, including ignitable hazardous wastes, spent halogenated solvents, mercury, lead, and wastes with a pH below 2 or greater than 12.5. No violations were noted for this facility under the RCRA-SQG database. Aurora Modular Industries is also listed in the Haznet database for the generation of waste and mixed oils, organic solids, unspecified organic liquid mixtures, and unspecified aqueous solutions. These wastes were disposed of at a recycling facility or landfill. Lastly, this facility is also listed in Wastes Discharge System (WDS) database for having continuous or seasonal discharge under the Waste Discharge Requirements. Threat to water quality for this facility under the WDS database listing was reported as a "Minor Threat to Water Quality."

El Dorado Stone: This facility is listed in the Haznet database for the generation of waste and mixed oils. These wastes were reportedly disposed of at a recycling facility.

3.2 Surrounding Property Summary

The following nearby properties were listed in the EDR Report:

Walgreen Distribution Center (Walgreens) located at 17500 Perris Boulevard adjoins the Subject Property to the south (crossgradient site). This distribution facility is listed in the RCRA-

Kennedy/Jenks Consultants

SQG and AST databases. According to the RCRA-SQG database, no violations have been reported for Walgreens regarding waste generation practices. The AST database indicates that Walgreens operates an approximate 13,155-gallon AST of unknown content.

First Fidelity Thrift & Loan is located at 17111 Perris Boulevard is approximately 300 feet northeast of the Subject Property (upgradient site) and is listed in the LUST database for oil impacts to soil only. This site received case closure status from the overseeing regulatory agency in 1992 for heavy petroleum hydrocarbon (oils) impacts to shallow soils. Affected soils were excavated and disposed offsite.

Section 4: Historical Use Information

4.1 Historical Aerial Photographic Review

Historical aerial photographs of the Subject Property and surrounding area were obtained from EDR. Photographs from 1938, 1953, 1967, 1980, 1989, 2002, 2005, and 2006 were provided to and reviewed by Kennedy/Jenks (Appendix B). An overview of the aerial photographs is provided below:

- In the late the late 1930s, the Subject Property appears to be undeveloped land. The surrounding area appears to be a combination of undeveloped and agricultural land.
- Between 1953 and 1980 the Subject Property and surrounding area appear to be used mainly for agricultural purposes. Structures, likely associated with farming, are scattered throughout the area, but no structures appear on the Subject Property during this period.
- In 1989, the Subject Property remains used for agriculture. Residential growth is evident to the distant north of the Subject Property. In general, the surrounding area to the east, south, and west of the Subject Property continue to be primarily used for agriculture.
- In 2002, the Subject Property appears developed in its present-day configuration. Several small structures, likely modular units manufactured by Aurora Modular Industries (former occupant), are located in the dirt lot immediately east of the earthen retention basin. The area to the distant north of the Subject Property continues to be developed for residential use, and the Perris Valley Storm Channel is also evident to the north. Farming practices no longer appear to be taking place in the surrounding area. Instead, the surrounding area appears to be a mixture of light industrial properties and vacant land.
- By 2005, the surrounding area appears similar to the present-day layout. Apparent modular units remain in the dirt lot immediately east of the earthen retention basin.

4.2 Sanborn Fire Insurance Maps

The Sanborn Fire Insurance Maps consist of a uniform series of large-scale detailed maps, dating from 1867 through 1969 depicting the commercial, industrial, and residential sections of cities. The EDR Sanborn Map Report (Appendix C) indicates that the Subject Property is an unmapped property; therefore, Sanborn coverage was not available.

4.3 City Directory

City directories have been published for many cities and towns across the United States since the 18th century. For each address within an area, City directories list the name of each resident or, if a business operates from that address, the name and type of business. While the geographic coverage of city directories is comprehensive for most major cities, many rural areas and small towns may not be included. In addition, many towns and cities have discontinued the practice of issuing city directories. Minimal City directory coverage was available for the Subject

Property. According to the City directory report El Dorado Stone occupied the Subject Property address in 2011. In addition, Walgreen Distribution/Warehouse was identified at 17500 Perris Boulevard and the Ross Distribution Center was listed at 17800 Perris Boulevard. Review of City directory entries for 2005, 2000, 1995, and 1990 did not yield any RECs or Notable Findings for the Subject Property. A copy of the EDR-City Directory Abstract is included in Appendix D.

4.4 Topographic Maps

Historical topographic maps of the Subject Property and surrounding area were obtained from EDR. Maps from 1901, 1943, 1953, 1967, 1973, and 1979 were provided to and reviewed by Kennedy/Jenks (Appendix E). Based on this review, the following generalizations about topography for the Subject Property and surrounding area are made:

- The Subject Property is situated at approximately 1,473 feet above msl.
- The topographic gradient in the vicinity of the Subject Property is towards the southeast.
- The Subject Property lies in a relatively flat area within a valley.
- The San Jacinto Y Potrero area is to the distant east of the Subject Property.
- Mount Russell and the Bernasconi Hills are located within the San Jacinto Y Potrero area.

4.5 Environmental Liens or Activity and Use Limitations

According to the EDR Environmental Lien Search Report (Appendix F), no environmental liens or activity and use limitations (AULs) were reported for the Subject Property.

4.6 EDR Property Tax Report

The Riverside County Assessor parcel map for the Subject Property was the only document included in the EDR Property Tax Report (Appendix G). Available maps identify the Subject Property at APNs 312-250-030, 312-250-031, 312-250-032, 312-250-036, 312-250-037, and 312-250-038.

4.7 EDR Building Permit Report

According to the EDR Building Permit Report (Appendix H), electronic records searched at the City of Hemet Building and Safety Department, City of Moreno Valley Building and Safety Division, City of Riverside Building and Safety Division, and Riverside County Building and Safety Department indicated the following noteworthy permitting entries:

- A permit pertaining to a spray booth for Aurora Modular Industries in June 2002.
- A permit identifying Aurora Modular Industries as a new manufacturing plant in 2001.

Section 5: User Provided Information

TCSCPI intends to demolish the existing structures and redeveloping the entire Subject Property with an approximate 1,150,000 SF industrial facility referred to as the Dorado Logistics Center.

Several documents were provided to Kennedy/Jenks by the User to prepare this Phase I ESA. Key documents reviewed by Kennedy/Jenks of significance to this Phase I ESA included the following:

- *First American Title Insurance Company, 2006. Preliminary Title Report, 17250 & 17300 Perris Boulevard, Moreno Valley, California. Prepared for Modular.*
- *LOR Geotechnical Group, Inc., 14 March 2005. Phase I Environmental Site Assessment, Former Aurora Modular Facility, 17300 Perris Boulevard, Moreno Valley, Riverside County, California. Prepared for Kothlow Moreno Valley, LLC.*

Information derived from Kennedy/Jenks' review of these reports has been incorporated into the body of this report.

Section 6: Agency Records Review

Kennedy/Jenks used the following agency sources to obtain information on the Subject Property and surrounding area:

- **Department of Oil, Gas & Geothermal Resources (DOGGR):** According to Version 2.0 of the Online Mapping System (DOMS), no oil and gas wells are located within a one-mile radius of the Subject Property.
- **National Agriculture Imager Program (NAIP), 2006:** Used to procure the most recent aerial photograph of the Subject Property and surrounding area.
- **State Water Resources Control Board (SWRCB) Geotracker Database:** The Subject Property and adjoining properties were not listed in the SWRCB Geotracker database.
- **Department of Toxic Substance Control (DTSC) Envirostor Database:** The Subject Property and adjoining properties were not listed in the Envirostor database.

Section 7: Interviews and Subject Property Reconnaissance

7.1 Interview

Kennedy/Jenks spoke with Mr. Javier Centeno, Facility Manager of El Dorado Stone, regarding his knowledge of the history and operations performed at the Subject Property. Mr. Centeno stated that El Dorado Stone uses the Subject Property solely for shipping and receiving; manufacturing operations do not take place on the Subject Property. According to Mr. Centeno large quantities of hazardous substances are not stored, used, or generated at the Subject Property. Small quantities of chemicals stored within the warehouse and office building are used for daily warehousing operations (i.e. products used for maintenance of the forklifts and janitorial supplies). According to Mr. Centeno, no underground storage tanks (USTs) or aboveground storage tanks (ASTs) are located on the Subject Property. The earthen basin located immediately east of the paved portion of the Subject Property is used for flood control and the capture of surface water runoff. Mr. Centeno mentioned that the basin is periodically maintained (weed/brush clearance), but that its maintenance is not the responsibility of El Dorado Stone. Mr. Centeno also noted that the Subject Property periodically floods during heavy precipitation events. Lastly, Mr. Centeno stated that the container/buckets situated on pallets along the southern boundary near Gate 2 contain sand and paint.

7.2 Subject Property Reconnaissance - Visual and Physical Observations

Nadine Stroud of Kennedy/Jenks performed the Subject Property reconnaissance on 31 August 2012. Visual observations noted during the ground reconnaissance are included in the table below. Photographs of Subject Property are included in Appendix I.

Subject Property Reconnaissance Summary Table

Feature / Characteristic	Y/N	Comments
Current Use of Subject Property	NA	The Subject Property is occupied by El Dorado Stone. El Dorado Stone uses the Subject Property solely for shipping and receiving; manufacturing operations do not take place on the Subject Property.
Vacant Spaces / Undeveloped Areas / Wetlands	Y	The eastern portion of the Subject Property is undeveloped land. An earthen retention basin is also located immediately east of the paved portion of the Subject Property.
Previous Uses or Investigations		
Concrete pads (associated with electrical systems or large machinery)	N	
Former Pump Islands	N	
Fill Ports (small manholes associated with USTs)	N	
Vent Pipes (associated with USTs)	N	
Former Building Foundations	N	

Kennedy/Jenks Consultants

Feature / Characteristic	Y/N	Comments
Drums and Containers	Y	According to Mr. Centeno (tenant representative) large quantities of hazardous substances are not stored, used, or generated at the Subject Property. Small quantities of chemicals stored within the warehouse and office building are used for daily warehousing operations (i.e. products used for maintenance of the forklifts and janitorial supplies). Mr. Centeno also stated that the container/buckets situated on pallets along the southern boundary near Gate 2 contain sand and paint. No surface staining was noted during the reconnaissance in the vicinity of these containers/buckets. Five-gallon buckets of concrete bonding adhesive were observed in a small storage room inside the warehouse.
Sumps	N	
Clarifiers	N	
Hoists or Lifts (<i>often associated with hydraulic fluids & auto repair</i>)	N	
Concrete / Asphalt patches	N	
Monitor/Supply/Disposal Wells	N	
Containers / Containment		
Aboveground Storage Tanks (ASTs)	N	
Underground Storage Tanks (USTs)	N	
Hazardous Chemicals (<i>Storage, Use, Disposal</i>)	N	
Petroleum Hydrocarbons	N	Small quantities of petroleum products are stored inside the warehouse building as part of forklift maintenance and repair activities.
Pesticide Usage or Storage	N	Prior to its construction as a warehouse complex, the Subject Property was used for agricultural purposes.
Unlabeled Containers/Substances	N	
Solid Waste Storage (<i>i.e. bins</i>)	N	
Septic Tanks	N	
Berms (<i>potential secondary containment</i>)	N	
Potential Waste Disposal Systems / Containment		
Waste Water Generation	N	
Pits, Ponds, Lagoons	Y	The earthen basin located immediately east of the paved portion of the Subject Property is used for flood control and the capture of surface water runoff.
Pools Of Liquid	N	
Floor Drains	N	
Drainage Systems (<i>i.e. ditches</i>)	Y	Storm water is directed via sheet flow to the earthen basin. Surface water runoff flows towards the east in the paved areas of the Subject Property. Precipitation directly infiltrates the ground surface of the unpaved portions of the Subject Property.
Dumping or Filling Activities (<i>i.e. soil or debris piles</i>)	N	
Roads And Trails With No Apparent Purpose (<i>potential for illicit dumping</i>)	N	
Potential Evidence for Chemical Impacts		
Materials Spills	N	
Unusually Stained or Corroded Pavement or Flooring	N	
Odors	N	
Air Emissions	N	
Interior water damage / mold (<i>potential pathway for impacts</i>)	N	
Stained Or Disturbed Soil	N	
Stressed Vegetation	N	

Kennedy/Jenks Consultants

Non ASTM Items & Miscellaneous		
Electrical Transformers	Y	Two ground-mounted transformers were observed on the Subject Property immediately west of the warehouse building. No leaks, stains, spills, or floor drains were noted in the vicinity of these transformers. No other polychlorinated biphenyl- (PCB-) containing electrical or hydraulic equipment was observed on the Subject Property.
Suspect Asbestos-Building Materials	N	
Water damage	N	
Suspect Lead-Based Paint	N	
Elevator Shafts	Y	An elevator is located within the two-story, office building located on the Subject Property. According to Mr. Centeno, the elevator is routinely maintained and no evidence of hydraulic fluid leakage was identified.
Fiber Optics Lines	N	
Heating Systems (associated with heating oil, gas, electric or steam radiators)	N	
High Voltage Power Lines/ Magnetic Fields	N	
Cellular Phone Tower	N	
Neighboring Dry Cleaners	N	
Neighboring Property USTs	N	
Any sites NOT listed in EDR? Incorrect addresses?	N	
Other Structures	Y	Modular structures affiliated with the former Aurora Modular Industries were observed near the Gate 3 entrance and in the southeast corner of the Subject Property. A metal storage container was also observed in the southeast corner of the Subject Property. Contents of the container included file boxes, desks, empty boxes, and a twin bed mattress.

Section 8: Historical Materials of Concern

8.1 Suspect Asbestos-Containing Materials

While the use of asbestos in the manufacture of most building materials has not been fully prohibited by law, the use of asbestos, for the most part, has voluntarily been discontinued since the late 1970s. Some non-friable materials, such as roofing material and floor coverings (vinyl floor tile and associated mastics) may have been manufactured with asbestos materials and may have been used into the early 1980s. Given the Subject Property building was constructed in 2001/2002, ACM is not likely to be present in the building materials of this structure.

8.2 Lead-based Paint

In 1978, the Consumer Products Safety Commission banned paint and other surface coating materials containing lead. Based on review of historical data provided in the EDR Report, the building on the Subject Property was constructed in 2001/2002. Given its age, lead-based paint (LBP) is not likely to be present in the building materials of this structure.

8.3 PCB Equipment

Polychlorinated biphenyls (PCBs) were historically used as coolants and lubricants in transformers, capacitors, and other electrical equipment beginning in 1929 because they do not burn easily and serve as a good insulating material. There were no documented or observed releases of PCBs on the Subject Property during the reconnaissance. Two ground-mounted transformers were observed on the Subject Property immediately west of the warehouse building. No leaks, stains, spills, or floor drains were noted in the vicinity of these transformers. No other polychlorinated biphenyl- (PCB-) containing electrical or hydraulic equipment was observed on the Subject Property.

8.4 Radon

Based on the location of the Subject Property, according to information provided by the United States Environmental Protection Agency (USEPA), radon levels in Riverside County, California are reported to be below the USEPA action level of 4.0 picocuries per liter (pCi/L). According to the EDR Report, four tests were performed in the zip code in which the Subject Property is located and these tests were within the acceptable EPA Radon Zone range.

8.5 Mold

Kennedy/Jenks did not perform (i) a mold/fungi inspection, (ii) any building material surface mold sampling, or (iii) perform air sampling for mold spores at the Subject Property as part of this Phase I ESA. Water stained building materials were not observed during the Subject Property reconnaissance.

Section 9: Findings

Kennedy/Jenks conducted the Phase I ESA in conformance with the scope and limitations of ASTM 1527-05 for the property located at 17300 Perris Boulevard in the City of Moreno Valley, California. Any exceptions or deletions from this practice are detailed in Section 10 of this report.

9.1 Significant Findings

No RECs or Notable Findings were identified for the Subject Property or surrounding area.

9.2 Recommendations

Based on the foregoing findings of this Phase I ESA conducted at the Subject Property, as well as representations made by individuals interviewed for this report, Kennedy/Jenks does not recommend further environmental action/investigation of the Subject Property at this time.

Section 10: Deviations & Data Gaps

No deviations from the ASTM 1527-05 standard were made during the preparation of the Phase I ESA portion of this report. Data gaps were not identified during this assessment.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

AURORA MODULAR INDUSTRIES (Continued)

1005415519

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A
Date Made Active in Reports: 05/15/2012	Last EDR Contact: 07/05/2012
Number of Days to Update: 40	Next Scheduled EDR Contact: 10/22/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/30/2012	Source: EPA
Date Data Arrived at EDR: 04/05/2012	Telephone: N/A

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/28/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 08/06/2012	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/07/2012	Telephone: 916-323-3400
Date Made Active in Reports: 09/06/2012	Last EDR Contact: 08/07/2012
Number of Days to Update: 30	Next Scheduled EDR Contact: 11/19/2012
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/27/2011	Source: Environmental Protection Agency

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (415) 947-8000
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 09/11/2012
Number of Days to Update: 79	Next Scheduled EDR Contact: 12/24/2012
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/21/2012	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/22/2012	Telephone: 860-424-3375
Date Made Active in Reports: 05/31/2012	Last EDR Contact: 08/20/2012
Number of Days to Update: 9	Next Scheduled EDR Contact: 12/03/2012

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision: 1979

North Map: 33117-H2 SUNNYMEAD, CA
Most Recent Revision: 1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

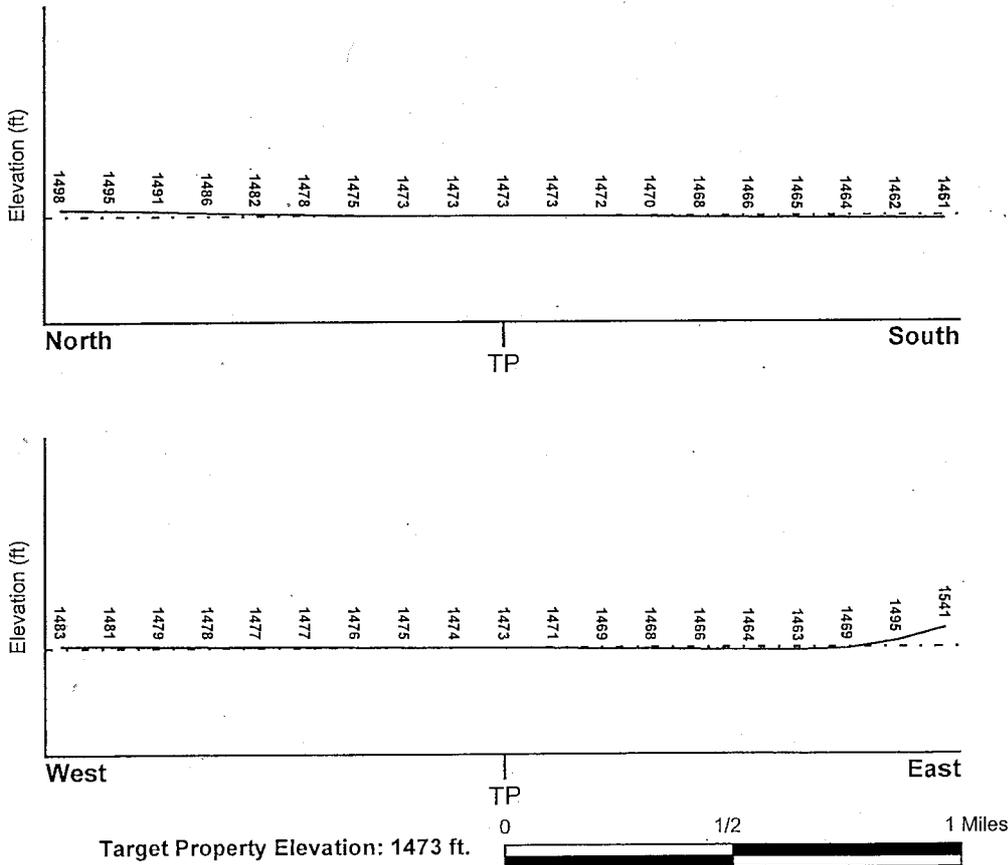

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
RIVERSIDE, CA

FEMA Flood

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: EXETER

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	16 inches	37 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	37 inches	50 inches	indurated	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
4	50 inches	59 inches	stratified sandy loam to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: HANFORD

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6
2	7 inches	40 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6
3	40 inches	59 inches	stratified loamy sand to coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6

Soil Map ID: 3

Soil Component Name: EXETER

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information.

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Kennedy/Jenks Consultants (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	<u>Target Street</u>	<u>Cross Street</u>	<u>Source</u>

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-05 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records – The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Kennedy/Jenks Consultants on Sep 12, 2012.

TARGET PROPERTY

17300 Perris Boulevard
Moreno Valley, CA 92551

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: YES

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

TARGET PROPERTY FINDINGS

TARGET PROPERTY DETAIL

17300 Perris Boulevard
Moreno Valley, CA 92551

17300 PERRIS BLVD

Date: 6/25/2002
Permit Type: COMCOMBO
Description: SPRAY BOOTH FOR AURORA

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0200193
Status: FINAL
Valuation: \$20,000.00
Contractor Company:
Contractor Name:

Date: 5/16/2002
Permit Type: BUILD
Description: STAIRCASE FOOTINGS ONLY

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0200622
Status: FINAL
Valuation: \$0.00
Contractor Company:
Contractor Name: GERMANIA CONSTRUCTION

TARGET PROPERTY FINDINGS

Date: 4/3/2002
Permit Type: BUILD
Description: ELEVATOR FOOTING ONLY

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0200442
Status: FINAL
Valuation: \$0.00
Contractor Company:
Contractor Name: GERMANIA CONSTRUCTION

Date: 1/15/2002
Permit Type: COMCOMBO
Description: FOUNDATION ONLY ON 120' X 60' TWO-STORY RIGID FRAME OFFICE BLDG
(AURORA MODULAR)

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0102822
Status: FINAL
Valuation: \$65,000.00
Contractor Company:
Contractor Name:

ADJOINING PROPERTY FINDINGS

ADJOINING PROPERTY DETAIL

The following Adjoining Property addresses were researched for this report. Detailed findings are provided for each address.

PERRIS BLVD

17250 PERRIS BLVD

Date: 3/25/2002
Permit Type: ELEC
Description: PLANCHECK AS BULT CHANGES FOR ELECTRICAL SYSTEMS AT AURORA
MODULAR.

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0200671
Status: FINAL
Valuation: \$0.00
Contractor Company:
Contractor Name: GERMANIA CONSTRUCTION

Date: 8/23/2001
Permit Type: COMCOMBO
Description: MODULAR RESTROOM BLDG INSIDE MAIN BLDG

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0101703
Status: FINAL
Valuation: \$15,000.00
Contractor Company:
Contractor Name: GERMANIA CONSTRUCTION

ADJOINING PROPERTY FINDINGS

Date: 6/26/2001
Permit Type: COMCOMBO
Description: NEW MANUFACTURING PLANT/COFO FOR "AURORA MODULAR"

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0100182
Status: FINAL
Valuation: \$3,862,315.00
Contractor Company:
Contractor Name:

Date: 4/5/2001
Permit Type: ELEC
Description: TEMP. POWER POLE

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0100825
Status: FINAL
Valuation: \$500.00
Contractor Company:
Contractor Name: GERMANIA CONSTRUCTION

ADJOINING PROPERTY FINDINGS

17258 PERRIS BLVD

Date: 7/18/2007
Permit Type: ELEC
Description: REPLACEMENT OF ELECTRICAL METER PEDESTAL THAT WAS DESTROYED IN TRAFFIC COLLISION

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0701990
Status: FINAL
Valuation: \$500.00
Contractor Company:
Contractor Name:

Date: 1/17/2003
Permit Type: ELEC
Description: IRRIGATION PEDISTAL

Permit Description:
Work Class:
Proposed Use:
Permit Number: B0300206
Status: FINAL
Valuation: \$1,000.00
Contractor Company:
Contractor Name: GERMANIA CONSTRUCTION

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- **Permit Number:** The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- **Description:** A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- **Permit Type:** Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

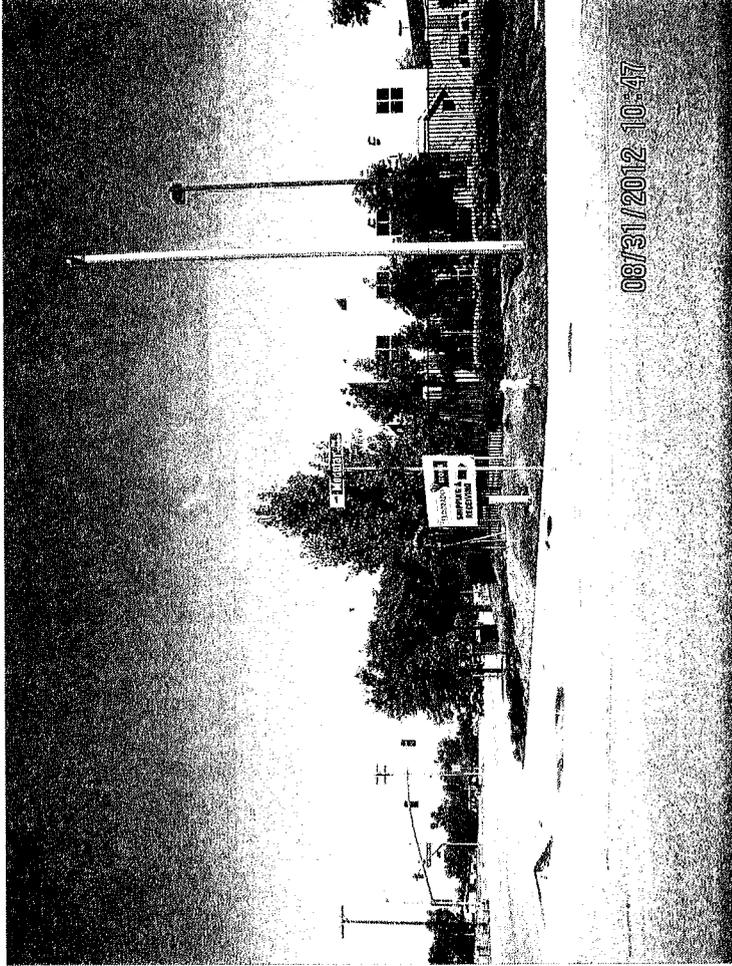

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: \$1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Appendix I

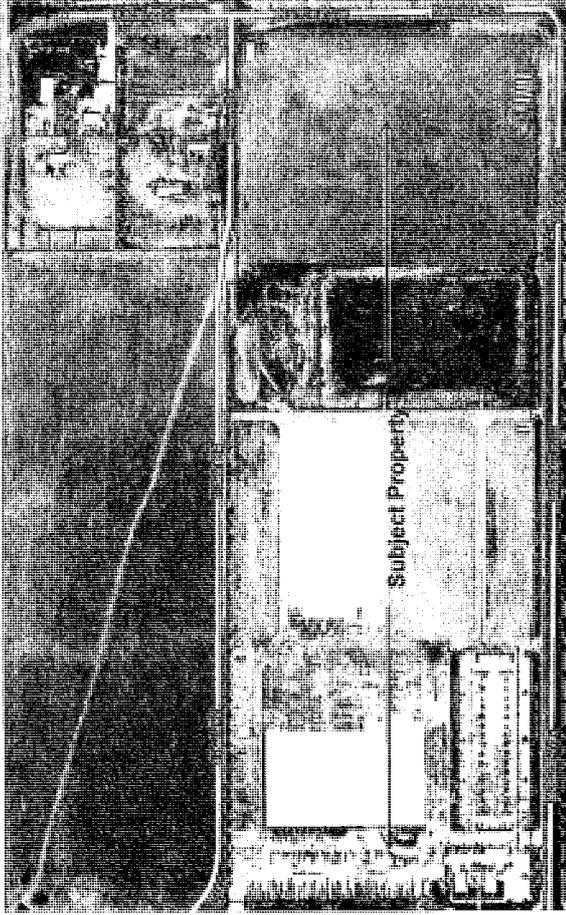

Subject Property Reconnaissance Photo Log

Photographic Log – 17300 Perris Boulevard, Moreno Valley, CA Phase I ESA

Photograph 1: The Subject Property is located at 17300 Perris Boulevard in the City of Moreno Valley, CA. The Subject Property is occupied by El Dorado Stone. El Dorado Stone uses the Subject Property solely for shipping and receiving.

Photographic Log – 17300 Perris Boulevard, Moreno Valley, CA Phase I ESA

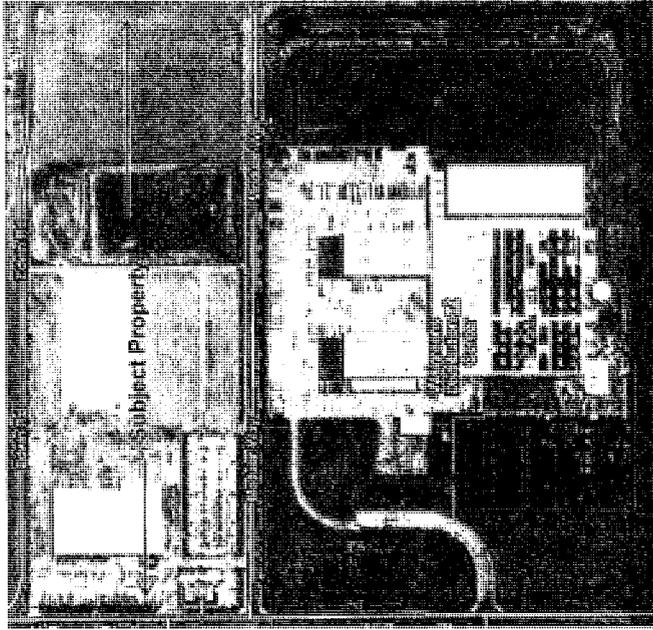

Photograph 2: Edwin Road adjoins the Subject Property to the north. A vacant lot, vehicle storage lots, and Moreno Valley Towing are located immediately north of Edwin Road.

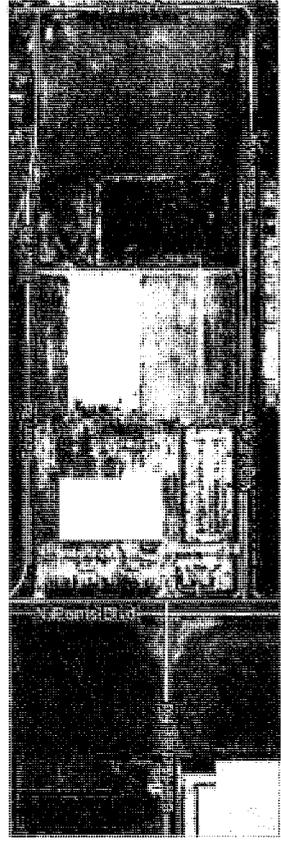

Photograph 3: Kitching Street/Nadina Avenue adjoins the Subject Property to the east. Eastern Municipal Water District is located immediately east of Kitching Street/Nadina Avenue.

Photographic Log – 17300 Perris Boulevard, Moreno Valley, CA Phase I ESA

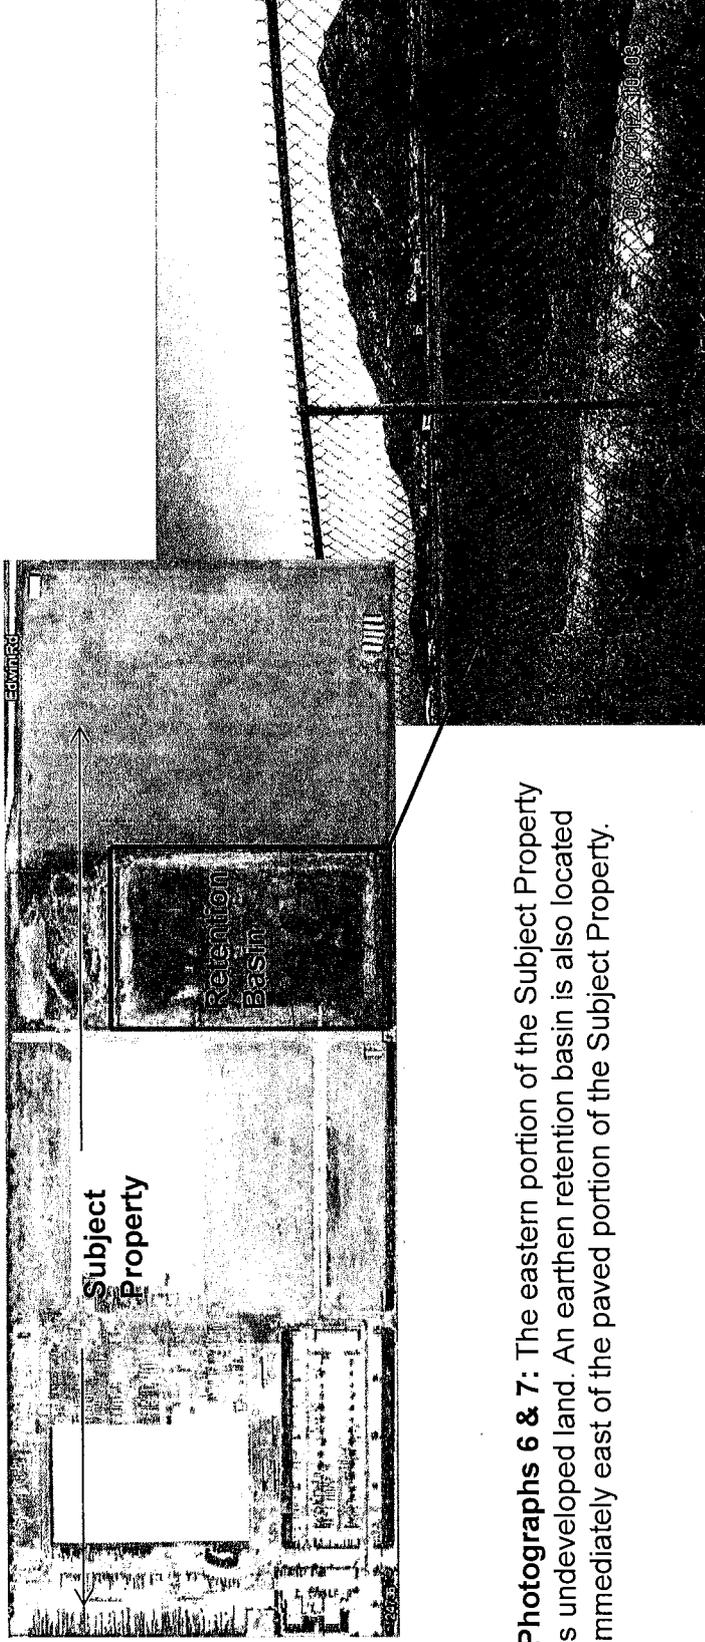

Photograph 4: Modular Way adjoins the Subject Property to the south. Walgreens Distribution Center is located immediately south of Modular Way.

Subject Property

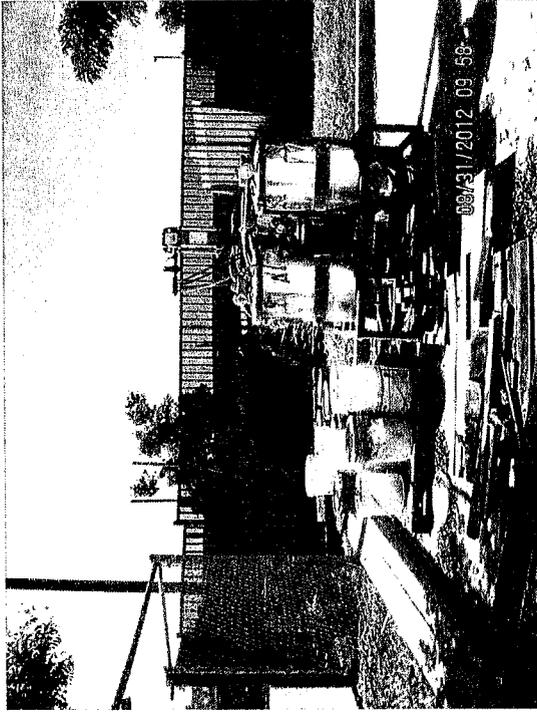

Photograph 5: Perris Boulevard adjoins the Subject Property to the west. Vacant lots are immediately west of Perris Boulevard.

Photographic Log – 17300 Perris Boulevard, Moreno Valley, CA Phase I ESA

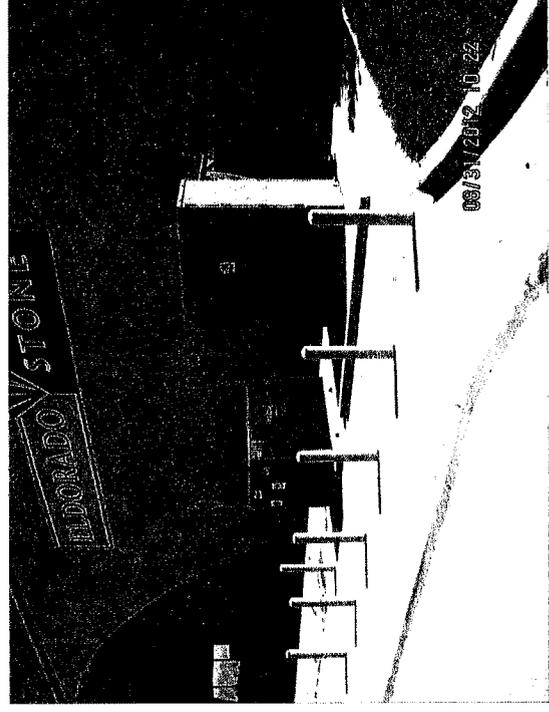

Photographs 6 & 7: The eastern portion of the Subject Property is undeveloped land. An earthen retention basin is also located immediately east of the paved portion of the Subject Property.

Photographic Log – 17300 Perris Boulevard, Moreno Valley, CA Phase I ESA

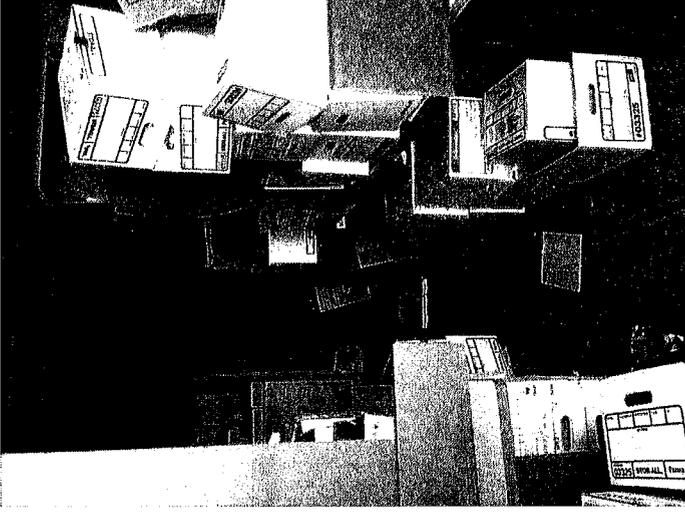

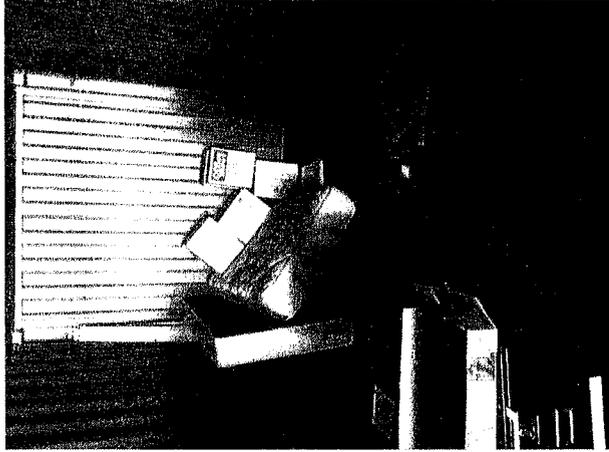

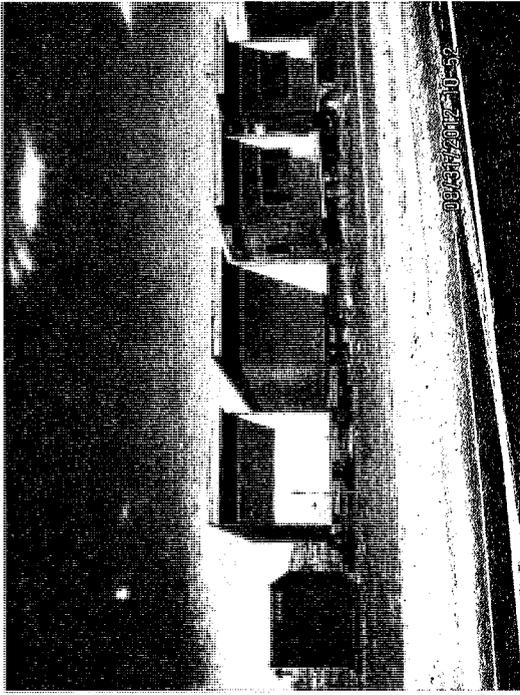

Photograph 8: Container/buckets situated on pallets along the southern boundary near Gate 2 contain sand and paint. No surface staining was noted during the reconnaissance in the vicinity of these containers/buckets.

Photograph 9: Two ground-mounted transformers were observed on the Subject Property immediately west of the warehouse building. No leaks, stains, spills, or floor drains were noted in the vicinity of these transformers.

Photographic Log – 17300 Perris Boulevard, Moreno Valley, CA Phase I ESA

Photographs 10, 11, and 12: Modular structures affiliated with the former Aurora Modular Industries were observed near the Gate 3 entrance and in the southeast corner of the Subject Property. A metal storage container was also observed in the southeast corner of the Subject Property. Contents of the container included file boxes, desks, empty boxes, and a twin bed mattress.
